

# Summer Term (2) Home Learning

In maths, we are learning about statistics. We will be drawing and using graphs to show information. For example, a pictogram shows information using pictures:

Favourite Fruit	
	  
	
	  
	
	 
	

Each piece of fruit represents one person. So, 3 children liked pears.

Make your own pictogram. It can be about anything you like.

For example, it could show the number of vehicles that pass by your home in 15 minutes.

Types of vehicles	
	
	  
	 
	     

The science topic this half term is all about animals including humans.

Why not create a fact sheet or a power point all about your favourite animal?

Is it a mammal, marsupial or a fish? Where does it live and what does it eat?

In art, we will be studying the artist Kandinsky. Create a fact file about him and include some of his work. You can present this in any format you choose.

**Be Creative!**

Using paints or coloured pens create your own piece of Kandinsky art.

The Great Fire of London was a major historical event.

Find out all the information that you can about the fire and share it with the class. You could include drawings of the city during the fire or a timeline of events.

In our PSHE lessons, we will be learning about people who help us and safety in the home.

Find out about the emergency services. Who are they and what do they do to help us and keep us safe?

In English, we have been learning poems and reciting them to our class. With your grown-ups, find a favourite poem and learn it off by heart. You can then share it with the class. Don't forget to use expression.

We will be writing riddles this half term so why not have a go!

I have two hands. I have a face.  
My hands go round and round.  
I have the numbers 1 to 12  
instead of smiles and frowns.  
*Find me in the classroom.*
