

Cooking with plants

Have you made any recipes that include plants that grow in your garden like carrot cake, courgette muffins, nettle tea?

Research some recipes and if you try one out, please take a photo to share with your class.

Save our animals!

Design a poster that will educate people about the endangered animals around the world.

Reducing Food Wastage

What kinds of waste do you throw away each week?

How do you and your family try to ensure you do not waste food?

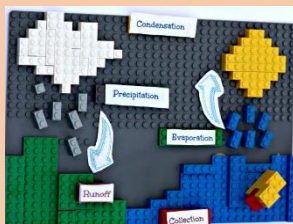

What could we do at school to avoid waste?

What benefits would there be to our school and to the planet?

The Water Cycle

Can you build a water cycle out of Lego or other materials?

<https://www.kcedventures.com/hands-on-science-create-a-water-cycle-project-using-legos/>

Mystery Home Learning Task

Use your imagination and come up with an idea of your own to share with the class.

Make a salt dough animal

What animals do you know of that are at risk of extinction?

Can you make a salt dough sculpture of one of these animals?

<https://www.youtube.com/watch?v=DX45KCbjGg>

Write to our planet

Write a thank you letter to the planet.

What are you really grateful for that you believe is important to the survival of our planet?

What would you like to say thank you for?

Water pollution activity

What do you know about water pollution?

Find out more here:

<https://www.naturalbeachliving.com/water-pollution-activities/>

How can we help bees?

What ideas do you have that could help our bees? Could you plant flowering plants to attract bees and other insects? Could you make a bee hotel? Take a photo of what you have done.
