

Choices

Conservation — good or bad?

Key Questions:

What's the cost of conservation?

Is extinction just part of life on Earth?

Is it just the best use of resources to try to save every species that is endangered?

Would you rather save the panda or the bee?

Will our future generations suffer the consequences?

Concepts:

conservation, endangered, extinction, habitat

Key Vocabulary:

species, poaching, endangered, extinction, deforestation, erosion, climate change, pollution, nutrition, conservation, biodiversity, captivity, environment

Geography

We will be exploring wildlife, ocean and environmental conservation around the world and whether they are a positive or negative concept.

We will be looking at endangered species from around Earth and investigating how we are impacting species.

Art

We will be creating our own powerful art work to represent ocean conservation.

Science

We will look at plants, seeds and flowers and discover their relationship with bees and other insects. We will also look at habitats.
